

VA114G, Dragon, Vacuummachine on battery, for sandwich panels.

Sandwich panel lifter.

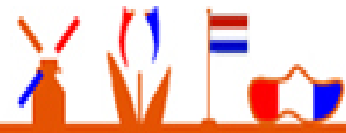

The machine works on battery, and can turn and tilt 360 degrees. There are 4 pads which can change position. There is a second holding device, you have to use during lifting. Maximum weight 250 kg, own weight about 75 kg. You also have the possibility to remove the vacuum pad and change it, for instance, for a oval 500 pad, this way you will have a basic machine for all the difficult lifting situations.

code 2005 for the quick change edges.
